

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (currently amended) A method for feeding an infant with milk equivalent infant formula, the method comprising:

(a) feeding the infant by fore-milk equivalent infant formula; and

(b) feeding the infant by hind-milk equivalent infant formula,

\_\_\_\_\_ wherein said feeding by fore-milk equivalent infant formula and said feeding by hind-milk infant formula equivalent are done sequentially during the same feeding session;

\_\_\_\_\_ wherein said fore-milk equivalent infant formula contains less fat than said hind-milk equivalent formula; and

\_\_\_\_\_ wherein the percentage of said fore-milk equivalent infant formula in the total meal volume is 31-55% and the fat content therein is 2.5%-3.5%, and the percentage of said hind-milk equivalent infant formula in the total meal volume is 45-69% and the fat content therein is 3.9% - 5%.

2. (canceled)

3. (currently amended) The method of claim 1, wherein said feeding during said same feeding session is performed ~~either by feeding said fore-milk equivalent infant formula and said hind-milk equivalent infant formula one after another or by~~ first feeding said fore-milk equivalent infant formula which is gradually admixed with said hind-milk equivalent infant formula.

4. (canceled)

5. (currently amended) The method of ~~claim 4~~ claim 1, wherein the percentage of said fore-milk equivalent infant formula in the total meal is 40% and the fat content therein is 3%, and the percentage of said hind-milk equivalent infant formula in the total meal volume is 60% and the fat content therein is 4.8%.

6. (currently amended) The method of claim 1, wherein said feeding during said same feeding session is performed using two bottles, one being filled with said fore-milk equivalent infant formula and one being filled with said hind-milk equivalent infant formula, the contents of said bottles being ~~forwarded~~ fed to the infant one after the other.

7. (currently amended) The method of claim 1, wherein said feeding during said same feeding session is

performed with a bottle which is divided into two compartments, one said compartment being filled with said fore-milk equivalent infant formula and the other compartment being filled with said hind-milk equivalent infant formula, the bottle ~~being designed in such a manner enabling~~ the infant to consume at first said fore-milk equivalent infant formula and thereafter said fore-milk equivalent infant formula gradually admixed with said hind-milk equivalent infant formula.

8-14. (canceled)

15. (Previously Presented) The method of claim 1, wherein said feeding the infant by fore-milk equivalent is done prior to said feeding the infant by hind-milk equivalent.

16. (canceled)

17. (new) A method for feeding an infant with milk equivalent infant formula, the method comprising:

(a) feeding the infant with fore-milk equivalent infant formula; and

(b) then feeding the infant with hind-milk equivalent infant formula,

wherein said feeding by hind-milk equivalent infant formula said feeding by fore-milk equivalent infant formula are done sequentially during the same feeding session,

wherein said fore-milk equivalent infant formula  
said fore-milk equivalent infant formula contains less fat  
than said hind-milk equivalent infant formula.

18. (new) A method for feeding an infant with milk  
equivalent infant formula, comprising

(a) first feeding the infant by fore-milk equivalent  
infant formula; and

(b) then feeding the infant by hind-milk equivalent  
infant formula,

wherein said feeding of the infant by hind-milk  
equivalent infant formula occurs by gradually admixing said  
hind-milk equivalent infant formula with said fore-milk  
equivalent infant formula;

wherein said fore-milk equivalent infant formula  
contains less fat than said hind-milk equivalent infant  
formula.

19. (new) The method of claim 17, wherein the  
percentage of said fore-milk equivalent infant formula in the  
total meal volume is 31-55% and the fat content therein is  
2.5-3.5%, and the percentage of said hind-milk equivalent  
infant formula in the total meal volume is 45-69% and the fat  
content therein is 3.9-5%.

20. (new) The method of claim 18, wherein the percentage of said fore-milk equivalent infant formula in the total meal volume is 31-55% and the fat content therein is 2.5-3.5%, and the percentage of said hind-milk equivalent infant formula in the total meal volume is 45-69% and the fat content therein is 3.9-5%.

21. (new) The method of claim 19, wherein the percentage of said fore-milk equivalent infant formula in the total meal is 40% and the fat content therein is 3%, and the percentage of said hind-milk equivalent infant formula in the total meal volume is 60% and the fat content therein is 4.8%.

22. (new) The method of claim 20, wherein the percentage of said fore-milk equivalent infant formula in the total meal is 40% and the fat content therein is 3%, and the percentage of said hind-milk equivalent infant formula in the total meal volume is 60% and the fat content therein is 4.8%.
